

# FTP Exchange

connecting people  
through fair trade

## 2 min Stake Test

### Need help purchasing FTP?

If you need help acquiring FTP tokens please email  
Fair Trader support team at [support@fairtrader.io](mailto:support@fairtrader.io)

Join Fair Trader social media for important updates:

Twitter: <https://twitter.com/fairtraderftp>

Telegram: <https://t.me/fairtraderftp>

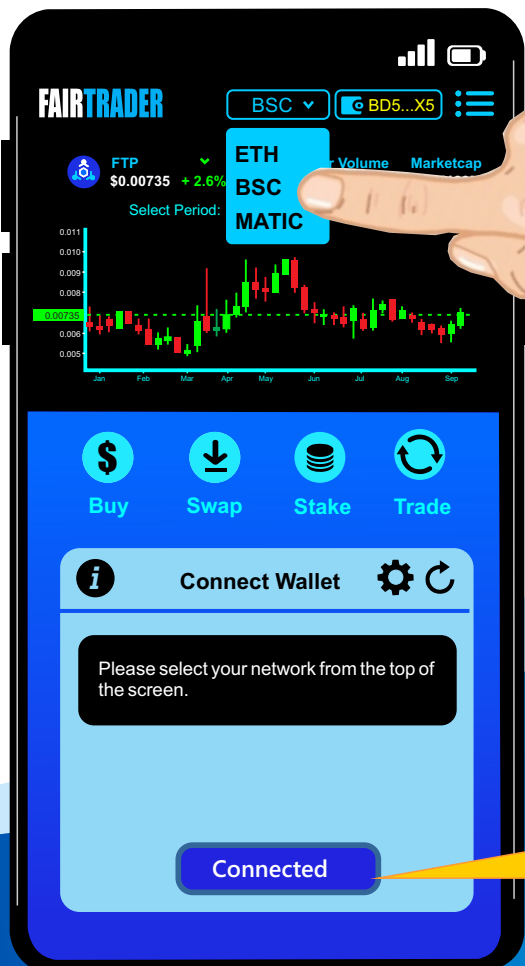

## Connect Wallet

### Connect Wallet

Connect your Metamask wallet by either selecting **Connect Wallet** tab on your smart phone or doing this directly from your wallet if it does not open automatically.

Fair Trader works best with Metamask wallet on all chains. Other wallets will be added in the near future.

If you do not have a digital wallet, please download Metamask wallet here: <https://metamask.io>

## Select Network (BSC)

### Select Network

Once logged into your wallet, select the Network you wish to use from Ethereum, Binance Smart Chain or Polygon.

The FTP Exchange will be first enabled to work on BSC (Binance Smart Chain). Ethereum and Polygon blockchains will be added during the year

## Stake FTP token

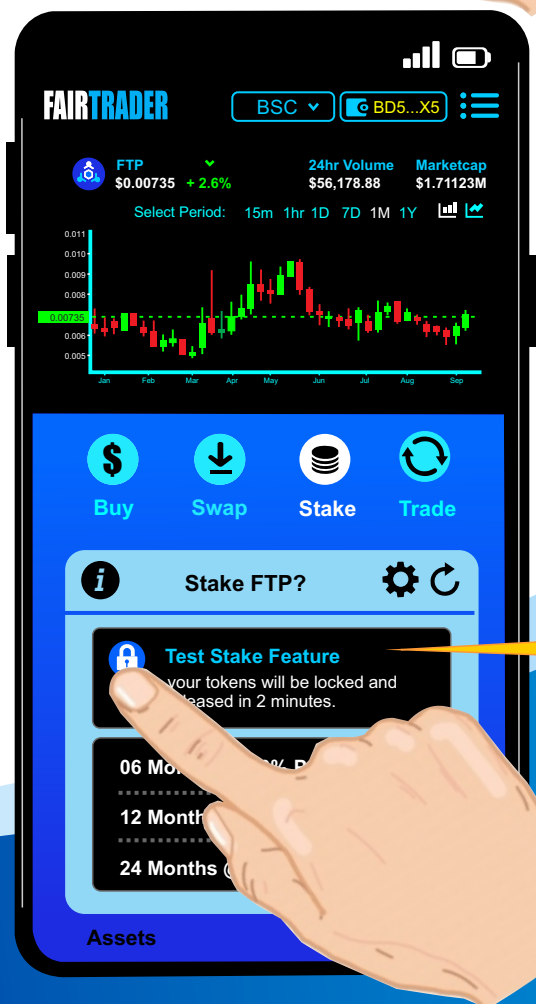

### Stake FTP token

Receive extra FTP tokens by locking them against early sale in your wallet. The longer the Staking period the more FTP tokens you will receive.

### Select FTP test amount

Select a small amount of FTP token you wish to Stake for 2 minutes.

See example on the left where 10 FTP tokens are selected.

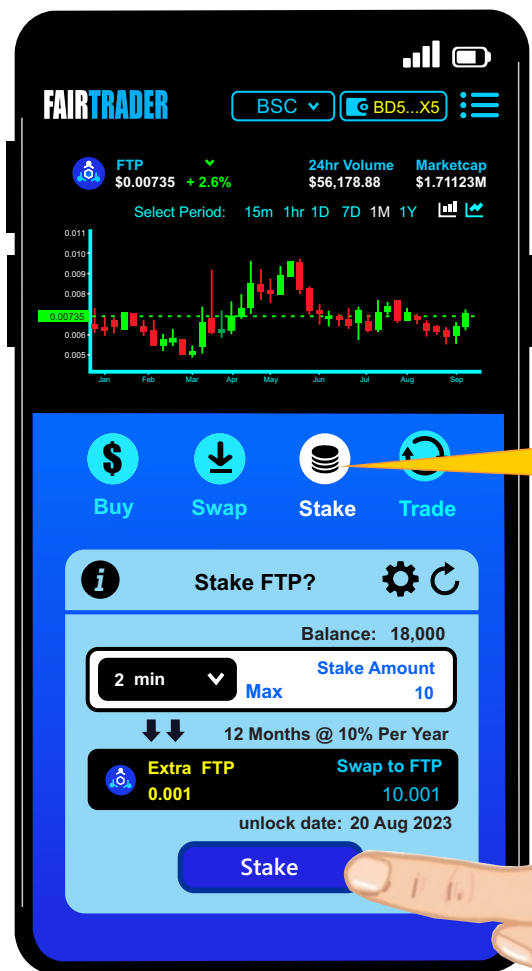

## Select Stake Test Feature

### Select Test Stake

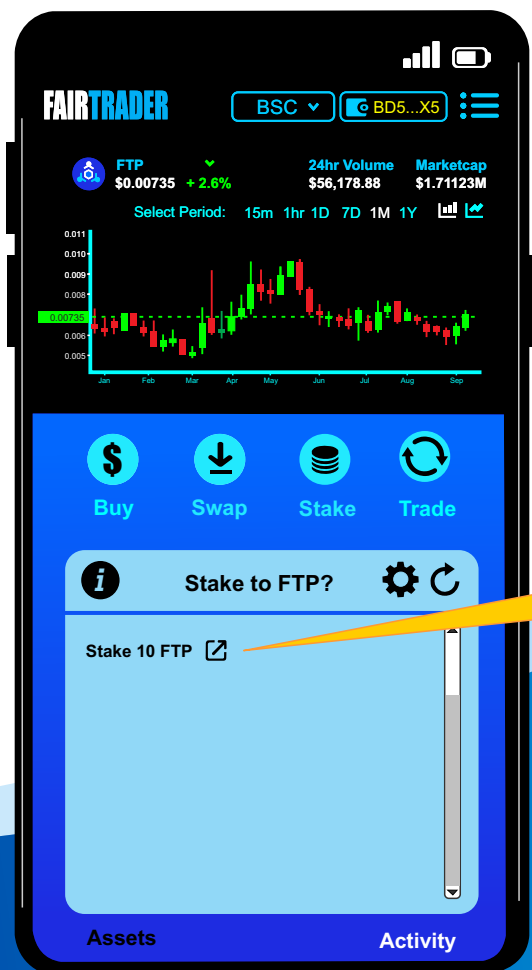

From the drop down options click on the blue padlock icon or **Test Stake**. This will update the display to 2 minutes lock (see above).

## Approve FTP Stake Test

### Approve 2 min Stake Test

To approve the 2 minute Stake test click on the **'Stake'** button as per the example on the left.

## Check Your Transaction

### Verify FTP Stake transactions

To verify your FTP transactions click on **'Activity'** and then select the transaction you wish to view.

This can also be done directly from your wallet.

See example on the left.
