Connect Wallet

Connect Wallet

Connect your Metamask wallet by either selecting **Connect Wallet** tab on your smart phone or doing this directly from your wallet if it does not open automatically.

Fair Trader works best with Metamask wallet on all chains. Other wallets will be added in the near future.

If you do not have a digital wallet, please download Metamask wallet here: **https://metamask.io**

Select Network (BSC)

Select Network

Once logged into your wallet, select the Network you wish to use from Ethereum, Binance Smart Chain or Polygon.

The FTP Exchange will be first enabled to work on BSC (Binance Smart Chain). Ethereum and Polygon blockchains will be added during the year

Stake FTP token

## Stake FTP token

Receive extra FTP tokens by locking them against early sale against your wallet. The longer the Staking period the more FTP tokens you will receive.

Select FTP amount

Select the FTP token amount you wish to '**Stake**'. To stake all the FTP tokens in your wallet you can select '**Max**'.

The Exchange will automatically calculate the Extra FTP you will receive at the end of the Staking period including the total amount of tokens you will receive. See example on the left.

Select Stake Period

Select Stake period (lock period)

Select the time your tokens will be staked (locked). The longer the time period the more tokens you will receive each year.

You can also try the '**Test Stake**' and see how the entire process works. Simply choose a small amount of FTP tokens and your tokens will be locked and released after 2 minutes.
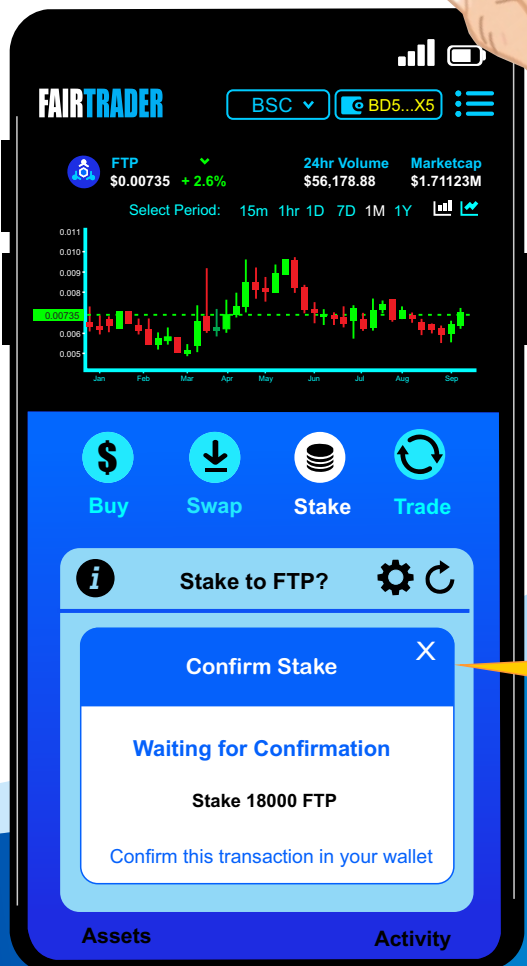

Stake FTP token

Stake FTP token

Once you have selected the amount of FTP tokens you wish to lock and the time period, you can confirm the tokens received in the display.
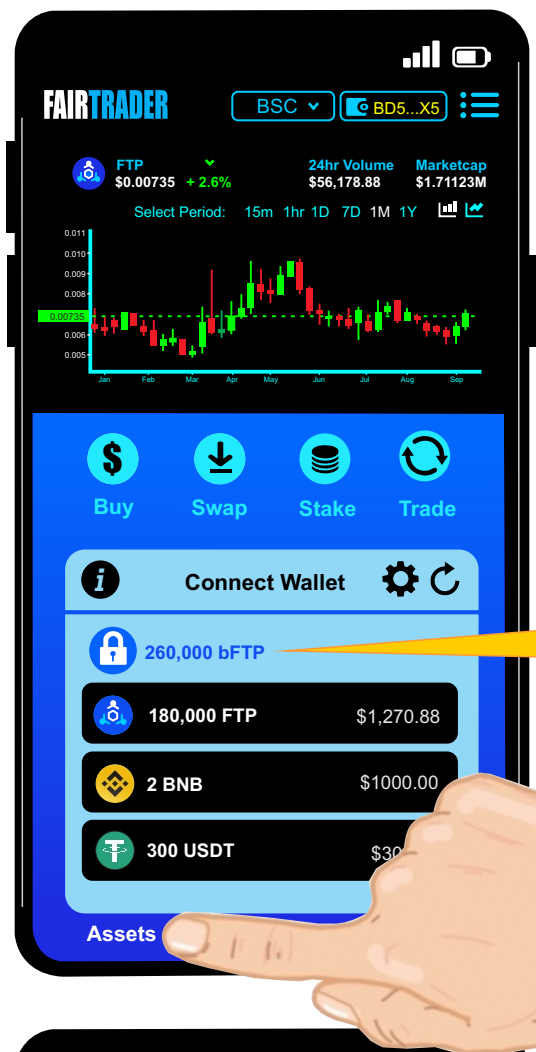

Once you are happy with your selection, click the **Stake** button.

Pay Gas Fee (transaction cost)

Once the Stake button is clicked you will need to pay the Gas fees in your wallet.

Please note there will be two Gas fees with an average cost about 12 cents USD on Binance Smart Chain (BSC) and you will need to confirm them twice in your wallet.

View FTP assets

Check my FTP assets

Simply click on the 'Assets' link at the bottom of the screen and your FTP tokens will be displayed.

The Assets screen will also show you the total amount of FTP tokens you have Staked against your wallet.
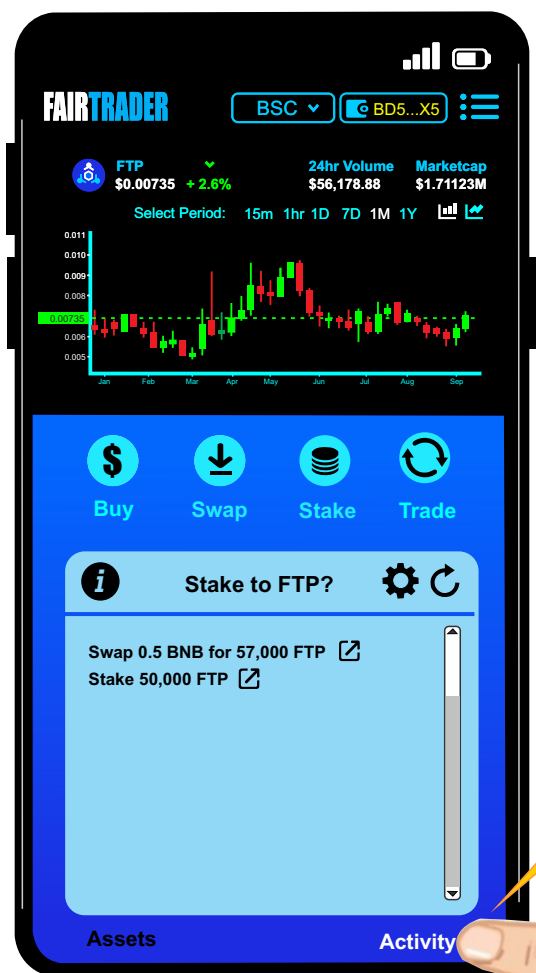

See example on the left.

View Staked FTP tokens

View my Staked FTP tokens

To verify your FTP Staked tokens (locked FTP tokens) simply click on the Lock Icon (see above).

You will be able to see both locked and unlocked tokens in your wallet.

To receive the unlocked tokens, click on the unlocked icon (green) and you will be asked to verify the gas fees in your wallet.

Check Your Transactions

Verify FTP Stake transactions

To verify your FTP transactions click on 'Activity' and then select the transaction you wish to view.

This can also be done directly from your wallet.

See example on the left.
