Connect Wallet

Connect Wallet

Connect your Metamask wallet by either selecting **Connect Wallet** tab on your smart phone or doing this directly from your wallet if it does not open automatically.

Fair Trader works best with Metamask wallet on all chains. Other wallets will be added in the near future.

If you do not have a digital wallet, please download Metamask wallet here: **https://metamask.io**

Buy FTP token

Buy FTP token with debit card

To purchase the FTP token with your debit card such as Visa or Mastercard click on the '**Buy**' icon or visit: https://buy.ftp.indacoin.io

Then select your currency and the amount you wish to buy. Please note a minimum purchase of $10 USD is required.

You will need to provide your wallet details and your email address then follow a simple KYC (identification) process after the purchase.

Buy FTP token on Telegram

You can also Buy FTP tokens directly from Telegram. Simply open FTP Telegram Bot and follow the step by step instructions.

To Buy FTP token via telegram: @fairtrader_official_bot

Select your currency and the amount you wish to buy. Please note that a minimum of $10 USD purchase is required. You will need to provide your wallet details and your email address and then follow a simple KYC (identification) process after the purchase.
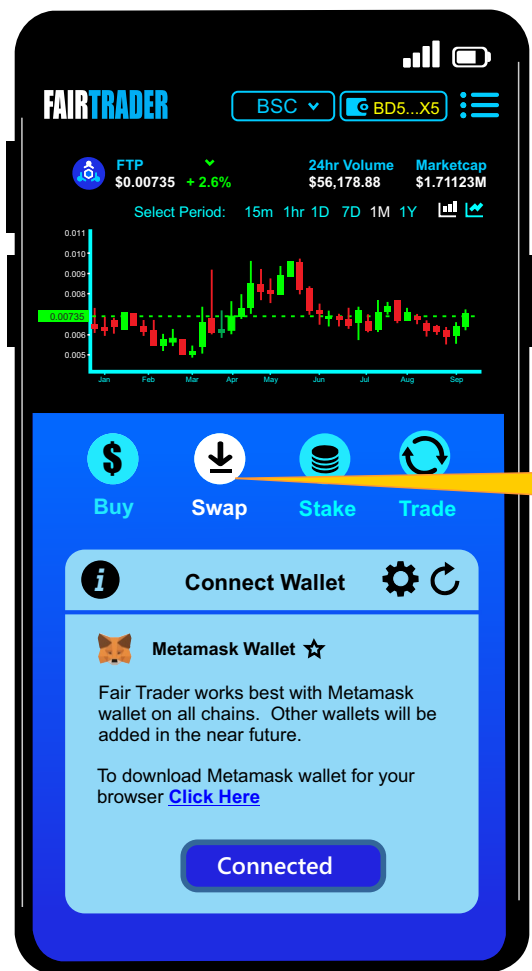

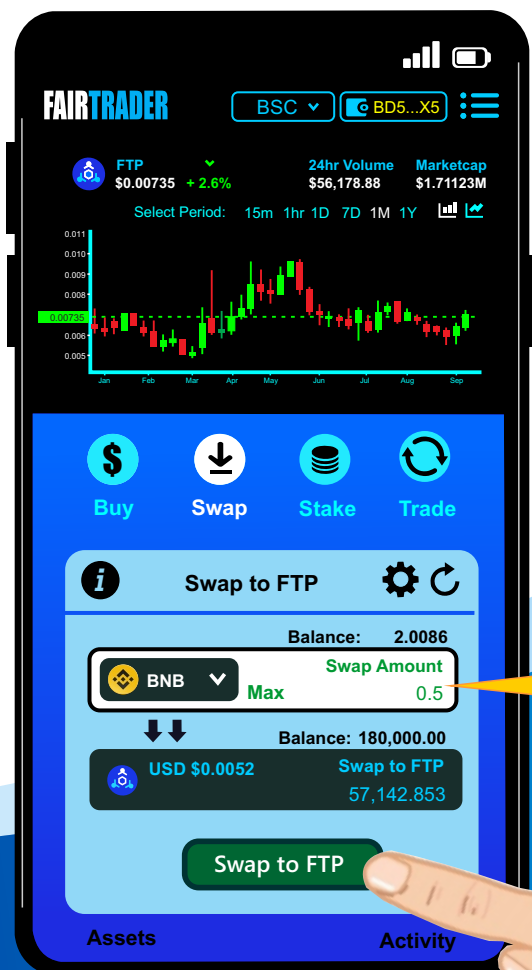

Swap FTP token

Swap FTP with another token

You can use the FTP Exchange to **Swap** the FTP token with another token in your wallet such as BNB coin.

Other tokens such as Ethereum, Polygon and USDT will be added soon and other popular tokens will be added through the year.

Approve Swap

Approve Swap and Gas fee

Select the token you wish to swap such as BNB and enter the Swap amount as per example.

The FTP Exchange will calculate the exact amount of FTP tokens you will receive taking into account the price of the swapped token such as BNB and the traded price of FTP token on Latoken Exchange.

You can also enter the amount of FTP tokens you wish to acquire and the exchange will calculate the exact amount of BNB coin required.

Once you have entered the amount select "**Swap to FTP**" and approve the Gas fees in your Metamask wallet.

Stake FTP token

Stake FTP token

Receive extra FTP tokens by locking them against early sale against your wallet. The longer the Staking period the more FTP tokens you will receive.

Select FTP amount

Select the FTP token amount you wish to 'Stake'. To stake all the FTP tokens in your wallet you can select 'Max'.

The Exchange will automatically calculate the Extra FTP you will receive at the end of the Staking period including the total amount of tokens you will receive. See example on the left.
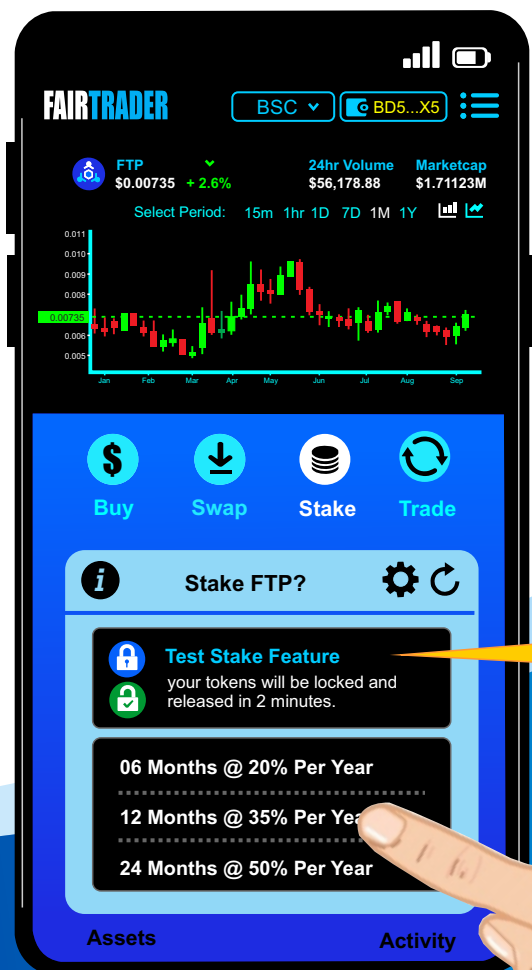

Select Stake Period

Select Stake period (lock period)

Select the time your tokens will be staked (locked). The longer the time period the more tokens you will receive each year.

You can also try the 'Test Stake' and see how the entire process works. Simply choose a small amount of FTP tokens and your tokens will be locked and released after 2 minutes.
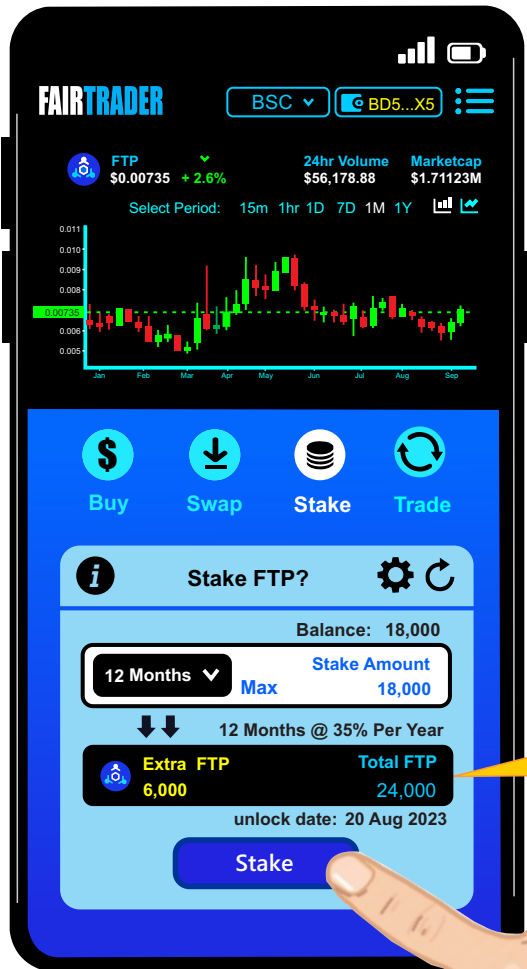

Stake FTP token

Stake FTP token

Once you have selected the amount of FTP tokens you wish to lock and the time period, you can confirm the tokens received in the display.

Once you are happy with your selection, click the **Stake** button.
Pay Gas Fee (transaction cost)

Once the Stake button is clicked you will need to pay the Gas fees in your wallet.

Please note there will be two Gas fees with an average cost about 12 cents USD on Binance Smart Chain (BSC) and you will need to confirm them twice in your wallet.

Trade & Sell FTP Token

Trade & Sell FTP Token

To Sell or Trade FTP token simply click on the '**Trade**' button and you will be directed to the Latoken Exchange. You can also go directly to Latoken Exchange: https://latoken.com

Please note you will need to open an account with Latoken before you can trade the FTP token.
